

Club Grubbery - Raw transcript of interview:

2024-09-03 Graham Hood brings an urgent appeal to everyone in authority in Australia...

Hello, my name is Graeme Hood. Some of you may know me from our podcast with John Larder called Club Grubbery. In the last three years, we've done everything we can to try and find a middle ground of truth in order to remedy the mess that this country has fallen into as a result of vaccine mandates and, and health tyranny.

By now there is as much evidence as needed to have us at least start thinking about these things. I'm about to show you a video clip of a government doing what a government should be doing. I'll come back to you after you've watched it. But I ask you to watch it carefully.

Pfizer marketed its vaccine as safe for pregnant women.

However, in February of 2021, Pfizer possessed reports for 458 pregnant women who received Pfizer's COVID 19 vaccine during pregnancy. More than half of the pregnant women reported an adverse event, and more than 10 percent reported a miscarriage, many within days of the vaccination. Pfizer also possessed information from its own October 2020 vaccine.

study on pregnancy in rats, indicating that it's COVID 19 vaccine was likely linked to infertility, loss of litters, and stillborn offspring. Number two, safety relating to heart conditions like myocarditis. Pfizer consistently denied any evidence of a connection or safety signal between its COVID 19 vaccine and myocarditis or pericarditis.

Indeed, on January 18th, 2023. When asked whether it's vaccine caused strokes or my myocarditis, Pfizer chairman and CEO Alan Burla stated, quote, We've not seen a single a single signal, although we have distributed billions of doses, end quote, a signal that he was referring to as a safety signal, which refers to a negative consequence.

However, as Pfizer knew the United States government, the United States military, foreign governments and others had found that visors COVID 19 vaccine caused myocarditis and pericarditis. Number three, effectiveness regarding variant variants. Pfizer also claimed that it's COVID 19 vaccine protected against COVID 19 variants, even though data available at the time showed Pfizer's vaccine was effective less than half the time against variants.

Finally, transmission. Pfizer urged Americans to get vaccinated in order to protect their loved ones, clearly indicating a claim that Pfizer's COVID 19 vaccination stopped transmission of COVID 19. Pfizer later admitted that it had never even studied transmission of it after its recipients received the vaccine and whether they could say it stopped transmission.

After making these misleading statements, Pfizer also engaged, uh, in some censorship attempts, uh, emails revealed that Pfizer officials coordinated with social media platforms to censor any speech critical of Pfizer's COVID 19 vaccine safety and effectiveness. It should also be noted that Pfizer elected not to join the federal government's vaccine development program known as Operation Warp Speed and declined that development funding.

When asked about that, Pfizer's CEO, Albert Bourla, said Pfizer did not participation in the program in order to, quote, liberate, end quote, Pfizer's scientists and to avoid government oversight of its vaccine development. He also said, quote, they want reports. I don't want to have any of that. End quote, referring to day when he said they he's referring to the federal government.

Pfizer's misleading statements contributed to success in marketing its vaccine in Kansas. By February of 2024, Pfizer had delivered over 3.3 million doses of its vaccine in the state of Kansas. This is, this accounted for over 60 percent of all vaccine doses given in the state of Kansas. The suit is being filed today and as I mentioned before, uh, it is part of a multi state effort in which more suits may follow depending on Pfizer.

What

you have just witnessed is a presentation of fact. Based on research that is easily accomplished in this country and others. You have witnessed a state government in the United States take steps to make sure that the truth is brought out and that justice is done. You have witnessed a government that is doing what governments are meant to do.

You have just watched a government that is prepared to put its money where its mouth is. You are watching, or have watched, a government in action to do the will of the people for the people's benefit. So I ask you to do the same. Because those of you in government By and large, have stood by and allowed the greatest tyranny, medical tyranny in global history to be perpetrated on your watch.

Regardless of efficacy, regardless of research, the fact is there is sufficient doubt that this needs to be properly and thoroughly examined, not to find out who's right or wrong, but to make sure we never make these drastic mistakes again. The decisions made on your watch have led to death. Broken marriages, destroyed families, lost businesses, and the level of the loss of the spirit of this country that is palpable.

Thousands of able bodied frontline workers of all persuasions, male and female, are currently unemployed at a time when they're needed most. And this has happened because you don't have the courage to stand up and tell the bureaucracies that are keeping them unemployed as a vendetta against their decisions to get them back into the workforce where they're most needed.

What on earth are you thinking? Who's running this country? Corporations? Trade unions? Why does the Victorian Firefighters Union have so much power to prevent its members from going back to work when we've already admitted that they were dismissed for the wrong reasons? This is reprehensible. This is not the time for vendettism and petty getting even.

This is a time to get this country fired up again. The tail is wagging the dog in Canberra and in every state capital. You have stood by in your houses of parliament, state and federal, in your chambers, and presided over the death of a nation may never be forgiven for. It's vitally important that you understand that if you put as much energy.

Into examining what's really going on and to examining the truth that is there for all to say, as that representative from Kansas displayed, if you put half the energy in suppressing free speech and covering truth into uncovering it. Then we would be a whole lot better off. But no, you were too busy towing the party line.

You were too busy trying to cover up the mistakes of the past because you're scared you will be held to account. Well let me tell you, the buck stops with you. When you put your hand up to be elected, to come into the gravy train of office. You actually agreed to represent the people of this country and the people of your electorate and many of you have failed.

Many of you have failed in historic proportions. Not only have you failed to, to seek and access truth for your own understanding, you've laughed and scoffed at those who have. Your behaviour in the houses of parliament and out on the streets in your electorates, you've laughed and will be remembered in history.

Some of you shot your mouth off too soon. Some of you are now still doing the best you can to make sure that none of this comes to light so that you don't have to answer for your actions. Some of you are guilty of willful negligence. Some of you are guilty of corruption. Some of you are guilty of just not doing your research and not doing your job.

You were elected to not only do the best thing you could for the people to keep them in truth, to see them live their lives in peace and harmony in this land. You're also elected to hold the bureaucrats over which you are meant to rule accountable. You have failed to do so. You are still failing to do so.

The people of this nation and those that will come after us We'll look back on this time in history and you will be judged. My purpose for making this video is to get you to drop party line, act in your conscience, grow a backbone, and at least examine it. We may be wrong. We may be right. But while you're trying to protect your ass, there's a whole bunch of people in this country who are going through abject misery.

There are people in this nation living in tents. There are people in this nation who have lost everything because of vaccine mandates, and they are owed an apology at the very least. We now see that this whole farce was just that, a farce. Research highlighted in the speech made by the, the government of Kansas clearly show that all the relevant facts were there right on the table for you to look at and you failed to look at them.

You denied the people of this country a proper and thorough investigation and you've done nothing but gild the lily ever since. I can tell you that evil thrives, sin thrives and conspiracy thrives when people and governments keep secrets. Conspiracy theories are rife in this country and all over the world.

Why? Because you lie to the people. You keep secrets. And now you're spending all the money and energy in the world and government to suppress that by trying to block what you call misleading and misguided information, when most of that is emanated from within your own halls. So call me crazy, call me nuts, I don't care.

What other people think of me is none of my business. But I cannot and will not sit by and see this country go to the dogs while fat cats in Canberra and other state capitals just go along with a global narrative that's killing this nation. Either way, you have to release the harness that is holding back the tide of proper debate.

You have to encourage proper town hall debate where people who know the stuff that they need to know are there available, but you've canceled them. They're all there. And while all this has been going on, there has been legislation drafted and enacted that puts this, the people of this nation in great peril.

We have been a nation that has strived for decentralization for decades, and now you're trying to shut down the bush and bring everybody back into small zones called 15 minute cities. You know it. The laws have already been passed and enacted. It's all being set up. You know it, you know, that the big global, um, retirement fund managers like BlackRock and Vanguard are making their wealth on infrastructure development, development that was once carried out by the government based on taxpayer funds, but that's been relinquished to them, giving them complete control over everything that you decide in those houses that you work in, where do we go from here?

I don't know. But one thing is certain, if you have a conscience and you have a backbone, it's time to stand up against your party and say enough is enough. You need to do what others have done and risk losing their political career.

Because what's it all for? Many of you I know signed up for this job to serve, and many of you have been, have been totally and utterly crushed under the weight of bureaucracy that doesn't let you do what you set out to do in the first place. I know because I've spoken to some of you. I say this again and I'm almost sick of saying it.

Australian Government, you must listen. You cannot keep hiding this under the carpet forever. Act with a backbone as the government in Kansas in the USA have done. Take a really simple look at the documents that they have presented because they've been on your desk forever and ask yourself the big question.

Have we been duped into something that is not in our nation's best interest? Because at 71 years of age, I can honestly tell you, I believe you have, and you've taken us down the drain with you. God bless you. I hope you ponder the video that I've shown you and my words as you consider your position in the coming months, there will be an election and most of us with any common sense know that nothing much will change because you're all tarred with the one brush while it's up to you, you make the decision, but just know that Australia is watching you and it's time you did your job.

God bless you and God bless Australia. My name's Graeme Wood. Thanks for listening.
