

Club Grubbery - Raw transcript of interview:

2025-02-12 Graham and John speak with Anna McLaughlin & Samurai John Cage

Hi everyone

and welcome to another fascinating interview series on Club Grubbery. Um, and we really are going international today, John.

Mate, we are. And uh, it's not the first time we're normally in the US or UK, but, uh, yeah, we're, we're great to be, uh, to, to be, uh, to be here. Around our neck of the woods.

Around our neck of the woods.

And that's right in the Southern hemisphere. We're talking of course, with someone who's familiar to most of you from New Zealand, Anna McLaughlin from New Zealand doctors, uh, SOS, uh, great to have you on Anna, Anna. And, uh, we, I know exactly where you're sitting. I haven't been in your house, but I know where your house is and it's beautiful.

Thank you. Thanks so much for having me guys.

Yeah. Great to have you here. And from Brazil, Samurai John Cage. Welcome to the program, John.

Thank you Australia for supporting our fight for our kids here in Brazil. Thank you very much.

Wonderful. So, uh, Anna, we want to get an update from you on what's going on in New Zealand, but clearly, uh, the, the draconian measures being taken against children in Brazil against families of children.

Uh, it's frightening. It's frightening. And if something like that takes off around the world, the world is going to be an absolute, uh, ticking time bomb. But before we go into that situation, Anna, tell us what's been happening in New Zealand, because you guys have been doing an amount of work over there.

Yeah, we are consistently being bombarded by these exposés of truth. It's getting quite, um, it's a, it's borderline exciting after a really long drudge through the mud, basically, of, um, being silenced for so long, but we're getting some. Interesting Official Information Act responses back. We received an official OIA response, I think it's called FOIA over there, Freedom of Information Act, so we just Drop the F.

But, um, where it showed that the people who had died from COVID in New Zealand, the vast majority of those people were, uh, they were boosted from these vaccines, these so called vaccines, which I found really interesting. So some people have gone out with that and we're just getting it, um, analyzed statistically to be able to put it in a per capita, um, per head of population type of.

stacked for everybody, but it's a massive amount. It's over 75%. So that's really, really big. Yeah. And then with the USAID stuff, um, it's really, really interesting how we have been discovering, um, since this story has broken that it's quite systemic, the funding from USAID right throughout New Zealand. And that is very, very interesting with a particular university receiving a lot of funding or connections with USAID.

Wow. Wow. So 75 percent of COVID deaths were people who were boosted.

Approximately so, yeah.

Safe and effective, John? Well, no. Safe and effective. Uh, and, you know, look, we're seeing things. Last weekend we had three AFL players, uh, not players, but celebrities who have been retired players and a coach. The eldest was 53, the youngest was 42.

All dropped dead in one day. Three of them. And, you know, that doesn't even raise an eyebrow. It doesn't even raise an eyebrow in the media. It doesn't even raise an eyebrow. So, um, so, so much to unpack. So how are the Kiwis holding up with all of this?

Doing pretty well. People are, there's a lot of people on social media who are like, we just want to move on from COVID.

We just want to be able to kind of get on with our lives. But the problem is, is that we need to be able to set up structures so that we can, if anything like this ever happens again, we can actually make a stand and say no. Um, so there's a lot of truth that's coming out to be able to empower people, because I've noticed over the years, so much.

of our sort of personal sovereignty, I guess, has been taken away from us by messaging in the media, by government organizations. And this truth that's been brought to light this year so far, it's been a wild year and we're only in February, um, it's been able to sort of encourage and empower people that they have been correct this whole time.

So it's, it's a mixture of, Kind of dismay, but also encouragement.

Yeah, we've got to keep this fight going because, um, it's, it's clear that if this thing has been sinister from the outset, which it appears that it has, then they're not going to stop there. There'll be another one and another one and another one.

And we have to be about our wits. Don't we, Johnny Lata.

Well, we do hoodie. And I think people are a little bit overawed by the amount of data and information and people speaking out, um, in, in 2025, but look, it's so important to be vigilant and. and hammer this home. Uh, we, we can't just think, Oh, we're over the line now.

You know, we we've proven this is all bad. Uh, it's so important to, to really press on because if, if we don't, um, if we don't make sure that, uh, this is the last ever stunt I can pull, we're in real trouble.

And not only that, we've got a situation where we don't know how many, but they are, uh, in the tens or even hundreds of thousands, they're in more than the hundreds of thousands of people who are vaccine injured, who are not getting support and proper medical help because nobody's prepared to diagnose the problem.

So we've got all these people who are effectively dying or having their destiny stuff snuffed out because governments and bureaucracies and big pharma will not admit. That this has been a scam right from the beginning. And so we have to forward John. So Anna, before we go to our guests from Brazil, uh, Johnny Cage, um, how do you two become involved because, uh, you helped us arrange this interview with John.

Yeah, so I met John at a, um, in a conference in Geneva last year, where we all spoke outside the United Nations and basically stood up and said, this is not going to happen again. And, uh, from there we discussed, we got discussing the appalling mandates that are existing in Brazil at the moment. And what I found really concerning is that When you look at New Zealand's Pandemic Preparedness Response, um, Act or Bill that is currently being processed at the moment, the same laws could be enacted in New Zealand.

So it really got me concerned because if you allow it in one nation, it can have a flow on effect in others. And I think we're seeing that with the opposite, um, with what's happening with people, countries exiting the who at the moment, however, Brazil has these atrocious mandates where they can take your children off you, um, arrest you, fine you, and force vaccinate these children.

And what I really struggle with is the fact that the government seems to have an overarching say on how these parents have to raise their children, and that is not okay, especially in a so called democratic society.

Wow. So I guess here's where we cross over to you, John. I know we might have some accent, uh, issues.

Some of our people, uh, may struggle to understand some of the things that you're saying, but we, we get the message. So please tell us, uh, how long have you been involved in this?

Oh, I am, uh, thank you very much for this opportunity. I started to fight

since 21. I did the first, you know, rallies in March, uh, in Sao Paulo city. I started to make, you know, put the heroes inside the city, outside chambers and the state assembly against the vaccine passports. And, uh, yeah, here in Brazil, I still keep the fight because, you know, my brother lives in Europe, my sister also, and, uh, I know the entire world is just stopping this craziness.

of, you know, uh, push the vaccine over the people since 22. I guess. I don't know how about South Australia, but the 22, the entire world just stop it. In Brazil, what's happened? In 23, the minister, minister of health, just decided to add the COVID jab on national immunization program. That's the problem here.

You know, national immunization program got all the vaccines for babies and kids. These are usually programmers got, you know, decades, you know, so now all the states are covering. For COVID jabs for six month babies to under five years old kids to get in the school, but it gets worse. If they don't vaccinate, inoculate this poison over the kids, the public ministry, took care of our concert, they started to charge the parents.

This charge can get 30,000. I know one mother, they did, you know, they charging 30,000. I know other mothers, they charging 1,000 per day. This is what's happening here in Brazil. So that's why I am here. still fighting on the streets, but we got to fight inside the state. That's the reason next week on Tuesday and Thursday we're gonna provide it to public hearings in the most of, you know, Santa Catarina, Inferna.

We got thousands of parents. under this pressure. That's why I decided to make this public hearing inside the state assembly in both states. Yeah, it's a craziness. We are in February of 25, right? Why they are doing this? over the low risk group. We all know kids and babies are the lowest groups, you know, and it's craziness.

John, there was a lot of protests around the world. Uh, what were the protests like in Brazil at the time? Did you, did many people turn out? How, how were the authorities, the police, what did they do?

You know, Brazil, in my opinion, why this happened here in Brazil? Because Brazil is the protagonist, John, of 2030 Agenda, right?

This was announced for our Minister of Health Environment in last year in Davos for World Economic Forum on the stage. You know, both said Brazil is the protagonist of the agenda, the protagonist of immunization of his people and protagonist of combating the climate change. And, uh, you know, right now the president, they are leftists, you know, Lula, they are, you know, support socialism, et cetera.

And, uh, that's why the depression is so hard over the parents over here. He got about nine. 4 percent of kids.

It's crazy, you know, 94% and uh, we see 94%.

Yeah.

And we have seen, you know, every day, you know, babies, kids, teenagers, dying, you know, the quantity of teenagers, youngsters, and kids dying. I just sent to almost every day. You know, uh, they are diagnos, you know, heart attack, cancer, you know, blood, blood clots, and stroke.

Every day we see that, you know, on the schools, you know, and many father parents just wake up in the morning and found their kids dead in the bed. This is what's going on here in Brazil. That's why I'm, I'm asking for entire world for support Brazilian kids, you know, this fight, because there's no country, you know, did any coalition oppression.

For kids getting the school like Brazil and, uh, you know, they are charging the parents and if they don't vaccinate, they could be, they could swing the parents for trying to separate the parents from the kids. You know, I know just one, let's say one case, this mother from Huguenin Bissau State. There is four police car, went to her house, took her four kids.

I guess, you know, it's my kid, 2 years, 3 years, 7 years and 9 years old, and gave 7 vaccines all next day. All these 4 kids got, you know, injuries and harms right now. I never saw this entire world, even China, North Korea, Cuba, Nicaragua or Venezuela. You know, I didn't see this.

Alright, so the police, the police forcibly injected the children.

No, it's not police. Police, just take the, the kids inside the, you know, the house and send it to some, you know, half spot or hospital where they inaugurate. And they also, one of these kids, they, you know, wait to the school, to the school of this kid and take this kid on the school and send to some place for give it seven vaccines.

This is crazy.

Woody, it, it seems like, uh, Yeah. Morons, these morons have got the, uh, the scrapbook out from, uh, Geography when they're at school, um, Bill Gates and Ted Ross, and they've just gone, Ha ha! Brazil! It's the new Africa! They're, it's like they're just experimenting on you, on you guys.

Yeah, yeah. You know what's incredible?

They start to inoculate the Pfizer baby in the beginning. So last year, I knew, because we have access for, you know, many levels of governments, and I knew they approved Moderna. Can you believe that? Moderna is valid for entire world. And they started to inoculate the kids with Moderna, you know, vaccine over the kids.

And now they are going back to vaccinate with Pfizer, but we all know they have no, you know, trials to prove the safety, you know, effective. They are safe and effective. But, uh, yeah, that's why we are here, fighting here. So thank you very much. I really need support. You know, the entire world spread this.

You know what's going on here in Brazil, and I really believe the international pressure over Brazil can really, really help this situation here. Thank you very much, Oscar. Thank you.

So it's really interesting here when you listen to that case, because I've read through the documents that John sent through from the Child Protective Services.

And what they say in that document is urgency is evident as the child's rights cannot wait for the judicial process and vaccination must be carried out to prevent irreparable harm. However, these guys have no long term data. To say that the irreparable harm will be happening if they don't vaccinate.

But there is very, very strong evidence to show that the government, by force vaccinating these children, are creating irreparable harm. And that's really concerning.

Yeah, you know, I did a public hearing in federal senate in February of 24, in November of 23, I did all the public hearing in federal deputy chambers, and in that time, the federal deputy Bia Kisses invited the Minister of Health and the Director of National Indigenous Program for be on this public hearing, right?

So they made a lot of, you know, questions and asking for why they are doing this, and uh, Brazil is the only country. Uh, doing this, and they just lie to the people, you know, on public hearings. No, no, we got other countries in the world doing this. The U. S. has approved a national program of criminalization, even Japan.

We all know that. No, the parents, they don't make this pressure of the parents. They don't ask for getting the school, so they lie all the time. You know, the media here in Brazil is totally socialist. You, you all know about this, what's going on here in Brazil, you know, and, uh, yeah. In the, the, the Supreme Court in Brazil, the same day of Trump election, they made the inspection a rotation section.

And they, they, you know, um, decided to keep this mandate for babies and kids on the school. So in the federal level, we can not do nothing anymore because, you know, the president of senate, the president of federal deputy chambers, they will never, never, you know, confront the supreme court. We can't actually, as a federal deputy.

She just trying to put, uh, you know, a law against this creation and remove the COVID jobs over the National Immunization Program, you know, but, uh, she needed to ask the president of the TPP. Federal Deputy Chambers for submitting the, you know, the plenary for this votation. But this is not, never going to happen.

That's why I changed the strategy and we got to pull that from the bottom to the top. Just like in the beginning of the pandemic, you know. We had that law for lockdowns, you know, social distance, masks, and everything. It's from federal level. So what we did We start to, you know, confront, fight on the cities, states, you know, I provide tens of public hearings against the passport of vaccine and masks for kids on the schools and we won, we won.

What we need to do is keep fighting here in Brazil. You know, we can't, you know, keep our mouth shut and just keep in silence and just accept this. Erna knows me, I'm samurai, you know, I went to Japan for stop the campaign from government, Japanese government. With Euheplicon mRNA over the population, we are successful.

Just like in Geneva, when I met, you know, Anna, we stopped, you know, the signature of pandemic treatment for over 140 counties, right, Anna? So we went to, to Geneva. So I got, I just, you know, got to ask, you know, for entire world for support. You know, my fight here, and I really believe it is oppression from, you know, the entire world over Brazil can help.

Yeah,

that's it. So Ana, you wrote a bit of a summary for us on what's going on over there. Tell us about the fines that parents are having imposed on them and compare that to the average income in Brazil.

Yeah, so, so what I was told through John and, um, also from the testimonies that I've listened to, um, that have been sent out from Brazil, is they're getting fined 200 US dollars a day, which is, in the Brazilian currency, is actually 20 times The average income of a little family in Brazil.

So each and that is each day. It's for every day that you don't vaccinate your child, you get fined 200 US dollars, which is thousands of dollars in the Brazilian currency. So it's massive for these families. They're financially crippling these families, as well as raiding their homes and throwing the mothers down and hitting them to take the children.

So it's pretty tyrannical from what I can hear.

And for nothing because the children are at risk.

No.

Oh, that's one other point. Many mothers and parents, they got medical certificate. You know, saying the kids cannot having COVID jabs because they got some harms, injuries, you know, and they are sick. But the public ministry just refused this medical certificate.

Oh, I don't believe in this. So you got to vaccinate your, your kids. Otherwise we going to cover more, double the charge or swing you for trying to separate you from your kids. They don't accept a medical certificate. Can you believe that? So the judiciary, the jerk, you know, they, they, they are more, they, they understand more about health than the doctors.

John, Brazil's got a very large population. Uh, it's obviously got a lot of economic inequity. You've got a, uh, a base of Catholics in, uh, Brazil of 50%, maybe higher. Where is the Pope? Where is the Pope in all this? Where's the church?

You know, all the church here is, I got a lot of videos, you know, they supporting.

That's the problem. In my opinion, all the religions, you know, are contaminated from, you know, the owners of the world. This is a plan they created over 40 years ago, you know. And, uh, all the priests, you know, here in Brazil, since the beginning of this fascination, They are, you know, uh, saying to all the followers for vaccinate the kids.

I got tens of these videos, you know, um, even Catholic evangelical protest in any religion, they are, you know, um, pushing these. over the kids and asking on the, for example, I've been in the church. Oh, how many parents here vaccinated their kids? Oh, please. Oh, you got vaccinated your kids. It's very important.

You know, I, I, I had three doses for those, et cetera. Now, you know, there is no religion in Brazil against this. They are all contaminate and they're here in Brazil. Fortunately, you know, the main church in Sao Paulo, they are totally socialist. Unfortunately, they made a campaign for Lula. They made a campaign, the priests did a campaign for Lula.

That's the problem in Brazil. You know, um, yeah, we are, you know, the kids are here are under attack, psychology, biological, spiritual, from all sides they are under attack. How many,

how many people are annoyed about this in Brazil? Are there lots of people protesting?

I guess in Brazil I can kick, right? It's not precisely a normal number.

I guess 60 percent is catholic here. Evangelica is 20, protesting about 5 to 10, but they're all Christian, right? They're all Christian. We got a population, a Christian population, but they don't care about it, you know? They look like the hypnos, you know? You know, in all the church, the priests, and if it's Any priest try to say anything against the coffee jam, they just removed from the, you know, the church.

But John, John, are there, are there many people in Brazil? Um, uh, are they rallying? Are they protesting in the streets?

No, no. Uh, you know, Lula, our judiciary, they, you know what's happened, in 8th of January, you know, soon Lula gets the power, they went to National Congress, they make protests over there, but that's a lot of infiltrate, infiltrate.

And they broke a lot of, you know, doors and offices, etc. They just arrested over 2, 000 activists. There is, you know, still a grandmother with 70 years old. She got, you know, she gonna be arrested 30 years, I guess, 20 years. I don't know precisely. So this made all, you know, our people be scared to go to the streets.

They just go to the streets when Bolsonaro or other politicians invite, you know. And this is very punctual. But, uh, you know. Last year, I went to the street 10 times. I don't care. I give my, my, my life for our kids. I cannot stay, you know, uh, be scared, and don't fight, and just watch this happen. So, I start to climb the favelas.

You know favelas, the poor communities? In Brazil, the records are there. So I start to join the leadership from social program, the entire program. I just went to commercial center in the small seats around the Sao Paulo. Yes, I, I waited four times on the, you know, biggest avenue in Sao Paulo city. But it's only me and 30, 40.

You know, mothers and grandmothers and parents, so that's it. Everyone here is scared, but not me. I'm a samurai, that's it, that's why.

Wow. John, what's happening

in Brazil with the vaccine injuries? Obviously with such an intense program, are you aware of them? Are you hearing things in villages about, you know, kids dying?

Yes, every day. Just like I said at the beginning of the interview. You know, I receive everyday mothers just send messages on WhatsApp or Instagram and say Hey Samurai, I just lost my my son, he's 11 years old 9 years old, 13 years old you know, he had nothing And they just start to feel very bad.

They went to the hospital, they gave a couple of pills, and they come back to home and just die, sleep and die, you know. And nobody wants to talk about, you know, people with side effects over here. And, uh, we had a program here for, you know, on internet, they are just show, you know, the people was, was dying, but they just stop it because everyone here in Brazil is scared to fight.

They, they just really believe it. Any day, the Supreme Court or any judge can send the federal police to your home and arrest you. So I don't care about, they can arrest me, they can kill me. Actually, you know, um, they called to my parents, still calling to my parents house over two years and see if they don't stop, they're gonna kill them, kill me, etc.

But I don't care about this. I'm not scared about, you know, all of that. You know, they should be scared about me. No one knows me. I'm a badass, you know. So I gotta keep fighting. But I really, really believe we're gonna win this in the end. In the end. What we got to do is keep the flame on, you know. Don't give up.

Because, you know, we got a lot of news around the world, you know, from Zuckerberg. Tedros, and you know, Joe Biden, and many things happened around the world. We got this document from U. S. Congress with over 500 pages, right? They just saying, you know, the Lockheed is a fraud, you know, everything is a fraud, etc.

So, let's start to, to, let's keep fighting.

How do you feel about, um, Donald Trump?

You know, the conservatories, they all, uh, uh, support Donald Trump. But, uh, in my opinion, just like I said in the beginning of this interview, the 2030 agenda is for only world government. The system provides two sides. This happened, you know, in the history of humanity.

And they control the both sides. You know, they always create the bad guys and the good guys, you know, the white pieces and the black piece. They make the rotation, you know, in the government. But in the end, in our back, behind the scenes, They are, you know, uh, creating laws, you know, you know, uh, digital ID, uh, uh, digital coin.

And, uh, a lot of triggers from 2030 agenda is happening. Even Elon Musk or others, I really, this is my opinion, particular opinion. I don't believe in politics. I don't believe in people with, you know, from New Order, you know, I really just believe there is only two sides, them and us, the people.

Good and evil.

Yes, the lights and darkness. And this is the, you know, we are living the most strong attack from the darkness over the lights, over the, the kids. You know, in our job, mine, your, and etc. We are soldiers. On the lights, right? That's why you're here. Is that even the worst out in the world, you know, about the darkness, the corruption, you know, the, the kids attack, et cetera, but God sends the best soldiers also.

That's why they support the, that's why you just support the, our fight here in Brazil.

Sorry, John Guy.

Oh, I was just going to ask him what he, uh, John, how do they At the moment, I mean, where technology might not be available in some of these villages, etc. I mean, how, how are the authorities identifying those children, uh, that aren't vaccinated and, and, and imposing, uh, Those sanctions on the families, the fines, et cetera.

Yeah. Good point. Because when they, the end of the year, they got, you know, uh, search for a school for maybe, you know, put the kids on next year. Then they ask for vaccine card for all the parents. And then if there is no COVID vaccine on the cards, they ask for go to the hospital for vaccinate their kids.

If they go to the hospital, you know, we got about 30 vaccine for our kids and the teenagers, you know, I guess. They're 16 years old. There is 30 vaccine, right? So, but some parents just give about 10, 15, 20. And, uh, the hospital just starts to cover, oh, you got, uh, complete your card. There is no vaccine for polio or yellow fever and also covid vaccine, right?

So if they don't vaccinate the kids, oh, we gonna send your name. to the public ministry. The hospitals, the nurses, you know, they are sending the names of the parents for the public ministry. Then the justice officer sends a message to the parents. For asking, you got vaccinated your kids, otherwise they're going to charge you.

You got two weeks, one week, ten days, you know, just like this. That's how they found, they know the status of vaccine from the kids, you know, the school and also the hospital.

Are there many, are there many doctors who are speaking out?

You know, we got a doctor, you know, association here in the beginning of the pandemic, they start to prescribe and make programs with ivermectin, you know, the medicines.

I guess it's over 15, 000 doctors. I, I invite most, many doctors for participating in the beginning of the pandemic when they try to, you know, create the vaccine passport for participating in our public hearings. But after Lula gets the power, all of them just stopped to fight, they are scared to be arrested, scared to lose their certificate.

And, uh, they just keep it on the social media only. And I begged for over a year for all the doctors, Hey, I'm going to the street, please come with me, come with the mothers, please. I'm begging, I'm begging, begging. They never Uh, those are my, my requests, so it's very complicated, Brazil. I'm here desperate, that's why.

Because I have no support from the doctors, awake. I have no support from the politics. I have, you know, we just got one, two, or three politicians. We got thousands of politicians in Brazil. The journalists also, that's very impressive. The journalists stopped to talk about, I'm talking about the conservative journalists.

I'm talking about the conservative journalists. Right? They just talk about Trump, Elon, you know, Israel, other things, leftists, right, conservative leftists, right, left, so, but they never, never made, made one single interview with me. Even when I travel around the world, you know, you know, went to Japan, Geneva, events from World Council for Health, you know, with the top doctors in the world, they never spread nothing about what I have been doing.

Nothing. I'm totally cancelling, you know, isolate from all of them. Who should fight, be fight for our kids.

It just got to you guys. The kids just got to you guys. And, uh, and other, you know, freedom fighters and doctors around the world. Yeah, that's all we got.

What can people in Australia and New Zealand do to support Brazil, to support your cause?

You know, things like what are we doing here, you know, spread what, you know, what's going on here in Brazil.

Make pressure because if you, for example, this interview, you know, got a lot of views and people, uh, comments, thousands, million views, etc. So people in Brazil will start to, you know, Repost this interview. Hey, look, you know, somewhere I did interview, uh, for Australian people, New Zealand people. And, uh, there is thousands of, you know, Australians saying this is absurd, et cetera, et cetera.

So, uh, you know, I did interview for Canada two days ago, two days for Japan. Tomorrow I got interviewed for Calais ATV from Germany. That's why I'm asking for support. That's all I can do now. Because nobody is going to do nothing here in Brazil. They are all scared to fight. So the international oppression is going to give it to us a spoiler, a good spoiler.

People are going to say, hey, the entire world is asking about this, you know, mandate for babies and kids. You know, we saw a news in some country, other country. So we've got tens of countries making, you know, oppression over Brazil. So we've He's going to start to, people are going to start to listen and watch.

This is absurd.

Well, I guess one thing we can do is approach our Brazilian consulates and, and embassies around the world and, and voice our concern. I think that's, we have to let the Brazilian government know that this is being noticed around the world. I mean, Anna, we, we've seen, um, we've seen three particular countries in Australia, New Zealand, and Canada.

It would have been considered if the world turned, went to hell in a handbasket, everyone would want to live in Canada, New Zealand or Australia, right? Not anymore. Not anymore because we are, we are, you know, almost, we're, we're fringing on the draconian measures of the Brazilian government. There's no doubt about that.

Um, an Australian mother, Kiana

Probert,

has had a

love of the European Union. She

was taken away, taken away because she dared to ask a doctor for a second opinion. We've lost our right to a second opinion. We've lost our right to, um, to voluntary informed consent. We've lost our right to bodily autonomy.

There is no doctor patient relationship anymore. That's been taken over by the governments. The governments are too involved in our lives and it must stop. And so I think, I think consular, um, I think approaches to the consular groups around the world of the Brazilian government. If you feel impressed to support these kids in Brazil, and that's what we're talking about and their parents are fighting like crazy.

And losing the fight, we need to write to our, the Brazilian embassies, go to the consulate, send an email, do something, but at least let them know that we, we know what's going on over there and we're not happy.

Yeah. So what is I

love

this idea. Just let me say, and I'm sorry to interrupt you, but I love this idea.

If you're some doctor association for Australia, New Zealand, you know, send any notification for, you know, Brazilian embassy. We are protesting against this. We are not agreeing with this. What are you doing with your kids, etc. This is gonna, you know, be awesome. Sorry, Peter. No, that's

totally fine. Um, just what I wanted to say, though, is that, in regards to that, is, um, John is hosting These public hearings with the Brazilian state governments.

So he's doing two of them this week and they will be recorded. Um, uh, there's the likes of Dr. Peter McCullough, uh, Dr. Jessica Rose, Dr. Pia Corey, who will be speaking alongside Dr. Melissa McCann, the wonderful Australian doctor. We've got, um, Um, Adrian McCray from Australia who's been in part of the DNA contamination exposure.

Um, so there's a lot of people who will be speaking and presenting evidence at these public hearings. And what you could do is if you watch these hearings, they're online and then send them to the Brazilian consulate. In your country to be able to say, this is what is being said. This is what is being exposed by some of the top scientists in the world and medical professionals in the world.

And you need to be able to listen because. The voters will learn about this in the future and voters will remember and they will vote with their conscience, especially if irreparable harm has been done to those voters, they will change their minds and vote for somebody else. So it's not only the future of the children, but it could be potentially impacting the future of these government officials.

So there could be some, there are ways to be able to present it to people that are constructive and also authoritative at the same time. And those public hearings will be very, very useful in doing that.

Now, when's that happening, Anna?

So that in Australian and New Zealand time is happening on the 12th.

And the 14th of February, so this week, um, and they, it will start at approximately 6am in Australia and approximately, um, 8am, depending on the time zones, um, and New Zealand. Yeah. And there's going to be a huge range of speakers and they're so incredible of what they present.

Well, that sounds great. So we need to get the links to that and get everyone on the program to watch that.

And forward those links on to the Brazilian embassy.

Now, look, you know, you know what, uh, Australia, we, uh, we've been in this fight for nearly five years now, and, um, we're doing a lot to try and reverse some of the draconian things that have happened in this country. But when it comes to kids, the innocence, it doesn't matter whether you're Australian or Kiwi.

Whether you're Nigerian or whether you're, whether you're Brazilian, uh, we all have to fight for our kids because that's what this is all about. And if we don't do that, we, we cannot look at ourselves in the mirror. So we will post the links to that. Anna, if you can get those to us, we'll post them, we'll get people watching.

Now you guys are really good at writing to, writing letters and filling in petitions. Um, it's time that we thought outside our own borders and tried to help those people in need. There's a whole lot of stuff going on around the

world where innocents are being sacrificed to suit some kind of agenda. So, uh, any final comments, Johnny Lada?

Well, look, I, I think Hooty, uh, we have to make it everyone's mission that this gets shared. If you watch it, share it. Uh, we, we should have half a million shares on this. Get it all over the world. I, I, I mean, this is so, It's so horrific on so many stages. Uh, it just tells you what this WHO is doing. They are nothing but a communist outfit that needs to be, uh, pulled the plug on.

Um, they're an absolute disgrace. The churches, I've got to say, you know, better. Send this stuff to the Vatican as well. I mean, to think that this is going on. Uh, in Brazil where you've got 50 percent uh, um, uh, Catholics is beyond belief that, that, that church leaders, uh, bishops and the like, uh, are standing idly beside all this and saying, Oh, well, Jesus would be vaccinated if he was here.

I mean, you people, um, uh, gotta be joking. Uh, you're a disgrace. You're a disgrace to, um, to, to religion. Um, and you, you, you, you don't deserve a place, um, you know, in, in that high, high position of, uh, of respect because you're not, um, you're not. Uh, showing any compassionate leadership or demonstrating any sense of, uh, uh, religious, uh, beliefs that I can see.

You're just, you're just flushing kids down the toilet and committing them to an early grade and you're an absolute disgrace.

Look, I have to even take that a step further. I think that the religious leaders of the corporate denominations of this world are an affront to God. I think, I think God is not very happy.

God will, God will not be happy about this at all. The God I love is not interested in seeing kids suffer like this. He's about protecting the kids. In fact, the Bible states clearly in Jesus words, it'd be better to be thrown in a river with a millstone around your neck than to hurt any of these little children.

So I'm, this is a big thing for me. The separation of church and state is, is paramount in healthy democracy. And that has been trampled on because the church and the state are marching in lockstep. All the denominations are doing it. Every single one of them. And that's why the people are going to turn away from corporate churches in droves.

And they're just going to go straight to Jesus, which is where we need to go. Um, it's reprehensible. I'm glad you raised it, John, because the, the, uh, the corporate religions of this world have had the ability in the past to alter the course of history. Instead, they've just marched in lockstep with it and brought it about.

And so, um, uh, we've got, uh, there's a lot more to be said about that. And, um, are you feeling like you're winning in New Zealand?

That's a great question. It's, it sometimes feels like two step forwards, three, three steps back, but then other days it's 10 steps forward. So it's. A mixture, as I said at the beginning, it's a mixture of emotions.

I feel personally that each and every single day we are making slow and steady progress to be able to bring an end to what is happening. And there are some really incredible members of parliament who are also listening and wanting to create change. But what that change involves, Is every single person from the ground up being able to use their voice and participate in the process?

So if we can get the people being able to stand up, rise up and saying, no, this is not okay, then we will win. And very, very quickly. I think what we underestimate is the power of our own voice that. Eventually gets this collective roar rising up through the nation. So we need to be able to bring that.

There's a gene technology bill that's actually going through parliament now, which opens up our entire country to genetically modified medicines and food and all sorts. Um, that's absolutely atrocious and We need people to be able to send in their feedback. So there's a whole lot of things that people can participate in.

And then we will win. I have no doubt. I have no doubt that we will overcome this.

What could possibly go wrong with, uh, what could possibly go wrong? Man, I mean, it just seems like everything's ramping up, you know? And, um, you know, we've got a whole, a whole lot of different battlefronts that we're fighting at the moment.

They're all around health. We don't have a health system in the world. We have a disease management, a disease control system. That's what we have. And it takes, it takes brave troopers like Samurai John and people, people like that ilk to stand up and be a voice because if you're sitting on the fence, one thing happens when you sit on the fence, you get a splinter up your ass.

And, um, and it's not very pleasant. I don't remember having one there, I must say, but I can't imagine it would be a very pleasant thing. And. Evil thrives when people of goodwill do nothing. So do something, you know, this is happening on your watch. Your, your period of history will be remembered for what happens over these issues.

And who will remember the kids who are still alive if there are any. So, uh, look, I just think, uh, Johnny Cage, we, we will support this as best we can. We'll share this around. We ask to do the same thing. Uh, I think, uh, before we close off, I'll just do a prayer if that's okay.

Yeah, thank you very much. Thank you.

And, uh, thank you, Australia.

Lord, Father in Heaven, we just, we, we know that you, you seek the best for the little children, Father God. And there are so many innocent children dying around the world, in Palestine, in Ukraine. In Brazil, even in our own countries, Lord, and they're hidden, they're hidden from sight.

And we know that you're watching over this thing. We know that you are still in control. So empower us, develop our character and strength that we may stand for the children, because if we don't stand for the children, we have no moral authority anywhere. So please, Father, guide and lead us. And be with Samurai Johnny Cage over in Brazil and those Brazilian kids, father God, if he has a win for them, we have a win for the world.

May God bless him and Anna McLaughlin and all of us who go forward in this battle. We pray in Jesus name. Amen.

so much, John. We want to, we want to get an update from you again a bit later on. If we, if there's any progress, please let us know. Um, please get us the links, uh, ASAP, we'll get those up and, uh, we'll get our people to look at, um, uh, email addresses for Brazilian consulates around Australia and get people working on this.

You know, we've got it happening in our own country, folks up in Cairns and other places that we haven't even heard of. You know, the government Johnny raves on about the stolen generation. It's still going on. It's still going on. Anyway, Johnny, you've often been heard to say you just couldn't make this stuff up.

You couldn't make this stuff up and a lovely to have you, Johnny. Thank you so much. And, uh, don't forget what you did yesterday. Got you to today. If you want to make a difference, share this around. God bless you. And this is a great country because you live in it. Let's live up to that reputation. See you later.

And we'll see you on club robbery for God

bless you.

God bless you. God bless

you. Thank you very much. God bless you, Anna. Thank you very much.
