

Club Grubbery - Raw transcript of interview:

2025-02-21 Graham and John speak with Dr Judy Mikovits...

Hi everyone, Friday, the 21st of February Club Grubbery time again, Johnny, great to see you again, mate.

Thanks, Woody. Great to be here. And, uh, yeah, what a, what an episode this is going to be.

It is going to be a fantastic episode. We have from Houston, Texas at this time. Um, Dr. Judy Mikevich, great to have you on, Judy.

We've been really excited about this interview.

Oh, wonderful to be here. Sorry, I'm just a touch late.

No, that's okay. You're worth waiting for. Um, so many, so many questions we want to unpack with you, but you know, you're a virologist. There's, you've got a string of qualifications. You've written a myriad of papers.

You've written several books. You've been involved, involved in the movie Plandemic, uh, which has had rave reviews. Hi,

I'm Debbie.

Plandemic. Yes, sorry. We just had rave reviews, uh, some not so good. And I went to, I went to YouTube and had a look at some of your stuff and it was filled with, with doctors who were trying to discredit you.

You must be really kicking some butt over there.

Yes, I think when you tell them the truth and you find a little inconvenient truth to their lie about the construction of, why don't we just call them chimeric retroviruses, and the fact that SARS CoV 2 was injected in every polio vaccine since our governments made them in 19 Oh!

2004. Oh, and when I say our governments, it was a little collaboration between Germany, China, um, the United States, um, at military, um, our military group there in, in Frederick, Maryland, where I, um, actually I worked for the National Cancer Institute, um, for, uh, 22 years. Dr. Frank Rossetti. Um, 20 of those years, he worked there 39 years.

So our books, Plague, Plague of Corruption, upon which the movie Plandemic is, um, is based. Um, and of course, where Bobby Kennedy, um, Robert F. Kennedy Jr., um, wrote the foreword for Plague of The one last story that we had to tell them in 2019, um, is, is that all of these viruses were made in collaboration with China, with Germany's, with corrupt individual who literally come individuals who committed treason like Deborah Birx and Robert Redfield, that in fact, if SARS CoV 2 was in every polio vaccine since it was made in 2010.

Full work. the paper. It's more at a the real dr judy dot com. anything but data. I'm ac I'm a molecular biologist thesis, November 14th, proved that even though HIV was injected into Magic Johnson by way of a hepatitis B vaccine, it never was LAV. It never was the virus that was associated with gay related immune deficiency because, of course, Tony Fauci told the world only gay men, IV drug users, and prostitutes, could get HIV and therefore for AIDS.

Why is he not lying? Because he injected HIV into every single person in with by way of the hepatitis B vaccine. So cars, SARS, COV2 never caused COVID because you injected it in since 2004 and how many millions of people by way of that polio vaccine, the one that's made in Vero monkey kidney cells that also carries that was found in a bat cave in China.

How did we get molecular clones of viruses in a bat cave in China in a paper they published in 2012 in January, but they submitted it on Halloween, the bat lady, Shih Shing Lee. So you see, when we talk with data, and we were actually there, and we know how the sausage is made. And we were jailed. Yeah, they don't like me.

Because every single one of them is guilty of crimes against humanity. If you ever injected anyone with a shot where you didn't, where you did no testing, and you disobeyed the federal law, where you didn't take out the monkey, mouse, cow, pig, aborted fetal, you're tissue. M. R. N. A. D. N. A. And protein. Ah, and we proved it with our 2009 science publication.

Why was the COVID shop manufactured that the COVID diagnostic PCR manufactured in 2009? And who owns the patent? Well, I do. And the American people do. And the National Cancer Institute does. And the Resetti's do. So Tony Fauci owns nothing because this, he created AIDS, acquired immune deficiencies, and he created them by way of infection by injection.

So that's the short story of Blandemeter.

I have to interrupt you there because you're raising a topic that we're discussing at great length here at the moment. Um, we've been talking a lot with people who've received for the last 30, over 30 years ago, tainted blood products, contaminated blood. Correct.

Have you had that issue in the States?

Absolutely. It is described in great detail in our book called called Plague of Corruption. It's the chapter that we played on the X Facebook club a few weeks ago. I'll get it for you. It's the chapter that is called the serious. C E R U S boondoggle. Yes, the blood supply has been contaminated.

How do we know that? Arthur Ash, Ryan White. For 30 years, Plandemic, that first, that first 26 minutes that came out May 4th, 2020, never said anything but AIDS. It didn't say COVID. It didn't say XMRV. It didn't say anything I just said in the last five minutes. Um, it didn't say anything at all.

So we've had lots and lots of people die in Australia from infected blood.

Correct. Contaminated blood. HIV

and Hep C. They're getting no support in the UK. Massive payout. They want a massive legal action. And one of Australia's survivors went over there and gave a testimony in that inquiry. And yet we're seeing nothing happening in Australia. They're getting no support with medication.

People are dying everywhere. And we see this as a real issue because it points to the corruption in the health and medical industry that transcends all the things. Thalidomide. Um, the coverups of various things, uh, pelvic mesh, um, so many other issues. And now of course, uh, COVID 19, uh, GF, uh, sorry, uh, genetic therapies.

Um, what, what has happened for those survivors in America? Have they been getting support, the infected bloods?

Um, no, they have not. They've not been given any support just like you in Australia. And that's why our prayer and why everyone with with God speak with Turning Point USA with Charlie Kirk, they're around the country here in Houston there in Phoenix, with the actual cures for all of this all the way back.

That's where we just were here a little late today because we, we formulated the product and we're never going to give up. It's already been there. We own the patents for it, as I just mentioned. Um, and, and we're, we didn't formulate it. We just, we just agreed to manufacture it in six weeks. You're going to have Dr.

Judy's, um, onco gen X for, for, uh, Preventing all the genesis of all disease and cancers, onco means cancers, from the generation, from these shots, for now more than 45 years. You're going to get it all back worldwide, because that's the gift of Bobby Kennedy. The last chapter of Plague of Corruption was, maybe there's one last thing.

Story I should tell you. And the one last story I needed to tell Bobby, when, in 2019, in October, he and I were at a meeting with the Truth about Cancer. And, and I left that meeting. Mickey Willis was there as well, the filmmaker. And, and it, and, and Dale Bigtree, the Informed Consent Action Network with Aaron and Siri.

Everybody was there. And, and basically the question was, you know, that I, I wrote Bobby and I said, we got to get this book out. I said, how can I help? Cause the forward wasn't finished yet. The book ended on page 200. And that was the way forward where we have all the treatments. We have the ozone.

therapies. We know about the glyphosate, the way forward, Luke Montagnier, all of the energy healing, Frank Schallenberger, um, Chris Exley from about the aluminum toxin, Chris Shaw from Canada, Stephanie Seneff, everybody, um, was, was in the way forward. Deuterium depleted water, Dr. Petra Dorfsmann, there we were working with Hungry Worldwide.

Dr. Klinghart, Cystis incunus, you know, so everything we've done for the last 40 years to cure cancer and, and AIDS, acquired immune deficiencies associated, um, with the poisons in our entire environment, all of which are in the vaccines of either our plants, genetically modified, that's not. food, our animals, the cows and the chickens being murdered, the food being destroyed as we use a fraudulent PCR test.

You know, all of these things were in pandemic and all we needed was Bobby Kennedy to run, to lead the health and human services because all the crimes were committed by the United States. States government, Health and Human Services from the Senate majority leader to every member of con of Congress.

What did you know? And when did you know it? Because everyone is guilty. The FDA will be cleaned up the EPA. You see it with Elon Musk. That's why they're so upset about a little x because he's they're going to give you transparency. So the people committing the crimes. Who injected newborn babies and cancer patients with things that literally caused their deaths.

This, uh, uh, Ed Dowd, Cause Unknown. That shot killed more millennials. Those shots. It's and then the entire Vietnam War in twin Americans, 25 to 44 year olds. It's just data folk. It's it's Ed Dowd. The book is called Cause Unknown. And here, as you know, there's You know, uh, Johanna and Rich with the Odom platform, the classes, the, uh, our cub technologies we've worked with, with ed group, with Maha, with everybody around the world, cardio miracle to get the solutions out to the people that have already been there with Peter McCullough, with all of the people who have been out there the last.

Five years as they've killed our family members as they destroyed us economically, um, like you, like your story, where somehow you're not allowed to talk to each other. Somehow I'm not allowed to give you a solution because it makes you what, so what doctor ever would, would not know what's in an injection and inject a newborn and cause their cancer and cover it up?

It's it's unacceptable or put anybody in a mask and and this it's everything it was all about control It was all about censorship. We almost lost all institutional memory, which is why with with Next wave resources and our cub why we created the classes of the autism one group where bobby From 2009 through now where you know autism one.

Oh safe and effective Criminal Paul Offit are sitting there in Bernie Sanders and on X. Go look it up. Oh, criminal communist Bernie Sanders called everybody on January 22nd to try and stop them and lie about these deadly drugs. Vaccines are drugs and they're deadlier than other drugs because they make them with cow.

pig, aborted fetal M. R. N. A. D. N. A. Protein. We've worked. I've worked As an expert witness in that what we euphemistically call a vaccine court, the National Vaccine Injury Compensation Program, the movie is called 1986, the act, and the man is Mike Hugo, the attorney who, along with Barbara Lowe Fisher, is shot in the dark.

1984 is shot in the dark. So you see how with God, um, and only with God, Only by the grace of God and the mercy of God are we coming back to where we can heal all because we now have people who honor our constitution and our God and as one nation under God here and internationally, um, to, to, to clean up the corruption of the WHO and the CDC and all of these health organizations who are actually.

Criminally liable for what just happened across this world.

Johnny

Lada.

Dr. Judy, you've, um Yes,

sir.

You've got a longstanding history with HIV and AIDS. I mean, what, what do you make of this study from Yale that, uh, scientists are now saying that the T cells are exhausting and, uh, the prolonged spike protein, uh, production with increasing levels over time for the vaccinated.

Uh, yeah, that's will be the mechanisms with HIV AIDS where I proved if you keep it latent, this whole T cell exhaustion thing doesn't happen if you never get another shot and you support the T cells and you appreciate the hematopoietic stem cell, the blood stem cell and the fact that we make, you know, One billion.

So every one billionth is a nanobot. Every virus is a nanobot. So we make one billion blood cells white and red in order in our innate immune system in order to protect the adaptive immune systems. The T cells, [https: otter. ai](https://otter.ai) The helper T cells. That's exactly what we learned in AIDS. And that's why HIV never caused AIDS.

And that's why Magic Johnson, though he was injected with HIV, never developed AIDS. But all you don't do. is ever inject them again. Because even in the present standard vaccines increase the M. R. N. A. Transcription of H. I. B. Even in the presence of highly active anti retroviral therapies which reduce the copy number to nothing.

So the so called bystander effects of the crippling of the immune system and the driving of the acquired immune deficiency and the prevention of food from being healthy. GMO food is part of the problems, killing our chickens, killing our cows, killing, having cows eat that all of it. So my longstanding history in that I never left.

And it was always to make sure we cured AIDS. We did it in 1987. This is just neuro AIDS. This is just, you know, the, the other AIDS. It's all acquired immune disease. And cancer is just one of the goals was to kill people with cancer. A paper that I show on my website, in fact, was that since 2008 and what I did in 1999 when I headed the Lab of Antiviral Drug Mechanisms of the National Cancer Institute Screening Technologies Branch of Developmental Therapeutics.

Yeah, we did all of that. We cured the mantle cell lymphomas, we got non Schottskill lymphoma. We could tell the mRNA your own God given protection. We've got the diagnostic and we've got the cures. Yeah, because you need to know which spike protein and which pathway is targeting and which part of the innate immune response is being bypassed.

You're not exhausted. T cells. That's insanity. You just didn't. You just didn't. You injected directly into the blood. I like to say you don't inject nothing into the blood of Christ. Yeah, I'm a homophobic. Nobody puts anything into my blood. It is and always was infection by injection, just like with HIV.

We cured that in 1987 in the Biological Response Modifiers Program. Chronic Lyme disease is HIV. Lyme, Connecticut. It's like the Zaire of Ebola. And Bobby did a really good job saying HIV in Africa was different than HIV in America. Why are our American kids getting Burkitt's Lymphoma if that's a disease of Africa?

Oh, because you injected the EBV variant with the HIV spike protein. Oh, the little spike protein of covid on an EBV that if you simply blow that EBV in front of a, a flask of non-infected cells. If I simply put it in the same incubator, the next morning it's confected and you close the lid and you never open it up and they're tumor cells in a month.

Yeah, that's the work we did in 2006, 7, 8, 9 and all the work came from the National Cancer Institute and Frank Ricetti and I held on to it. For dear life, and thank God 15 years later, we're giving it back to you. All the cures are already there, and this is a good day. That's why we were in Houston and a little late because it's like, let's do it now.

So now we've got Dr. Judy's, uncle Jen, x. Oh yeah, for all things Disease X, we gotcha. And the genesis of Disease X, it doesn't matter which satanic cult it came from, whether it's your pharma reps or your big ag or your nicotine corruption, um, not nicotine, tobacco, cigarette smoking causes cancer, the asbestos in those filters, the deadly poisons in those masks.

Oh, yeah, they drove the cancer. Nobody should ever, ever, ever, ever do this again. They know what they did. There's no such thing as turbo cancer. Took them 45 years to try and develop it and convince you. And all it all we needed was, um, uh, Trump and Kennedy. Uh, I had a lot of prayer Jesus to show up. We needed to repent.

I, I honestly want to say Second Chronicles 714. That's how I. Autographed Mickey Willis's book, Plandemic, because we, we, the people, all men and women on this planet, needed to humble ourselves and admit we took God out of our lives. There's only one God and it's not you. You bow to none others. There is no, you're not your own God.

No, it's not your truth or my truth. You know, it's the truth and that, that's only Jesus Christ. So it, it took quite a lot and I, I literally, I, I was, I couldn't stop crying last Thursday night when, cause I never saw it, the mercy of God, just, just that, I never thought we'd see the day when we could talk like this, so of course I, little bit of Tsunami Judy here because I didn't think I'd ever get to say it, so now I can't stop saying it, but I never really stopped saying it, but now I don't have to speak in tongues anymore.

We've, um, we, we've heard in the, um, in the news, uh, Judy, that, uh, Dr. Char is going to halt the, the vaccine, uh, program in the us. Uh, it, it, it, are you hopeful that that will happen?

I think we're gonna take a good look at it, make sure it's tested. I haven't had the pleasure of meeting Dr. Bob, but I'm thrilled, um, that, that he's in a position to help.

That's a critically important part of it. So, um, yeah.

Incredible, Judy. Um, so much is made of Fauci, um, you know, is enough. Quest. We've got a bunch of questions to ask you, but why on earth. A scientist fiddling with gain of function. Tell us what gain of function is for those who don't know what it is.

Well, if we go back to the HIV example that I just gave, so there was a, there was a disease that cropped up in apparently healthy men in America, UCLA colleges, where they started getting these ugly skin lesions.

Um, you know, these hemangiomas, these sarcomas, Kaposi sarcoma, um, uh, that usually you only see in the tip of southern Italy, and it's associated with, um, older men who've lost control of their innate immune system. And, um, and I'll just leave it at that. Sorry. But, um, it, and, and so we saw diseases that didn't make sense in patient populations.

So we, um, uh, we, we, we quickly, you know, pull things off the shelf and, and in order to help that appreciating the mechanisms of, of the pathways of how these diseases are called. So this wasn't, This was the National Cancer Institute. Frank Ricetti, Luc Montagnier in, in Paris. Um, of course, Dietrich Klinghardt is one in Germany, who was working on these ideas, and many, many other doctors, um, scientists.

MDs are not, Scientists and and medical journals are not scientific journals. I'm a PhD. I'm a professor. I'm not a virologist. I don't practice anything. I discover and I teach you how to change the practice. So you see what's happened. And and this is something I'm already I'm also delighted about with Trump taking down the Department of Education.

Um, because again, it's not education, it's indoctrination. So Fauci was National Institute of Allergy and Infectious Disease. Dr. Frank Ricetti and I were National Cancer Institute. We did all the work with, with, um, Luke Montagnier. In the National Cancer Institute, criminal Bob Gallo, Robert Gallo of the NCI, who was, who was literally, um, responsible for millions dying with HIV, because he wanted the diagnostic test, and he claimed his isolates.

Was not the LAV lymphadenopathy virus that gay men in Paris, France and in other cohorts in in, um, mostly in Northern California, Miami. Think about where gay men, um, you know, gay men, IV drug users and prostitutes. So again, doing a lot of drugs, behavior things that we, we have poppers. We have all the books.

to associate you with that. But so, um, Fauci and Gallo, and this is planned emic in the beginning, they call me up. I'm 25. They call Frank Rossetti's office. I'm only been working for Frank Rossetti since June 6 1983. Frank's off working in Europe as often. Professors go in during the summers and teach in in various classrooms across the country.

While students aren't in school, they teach the doctors. So Fauci calls up with Gallo and Chabner on the phone and this is all the lie about what the media says. I was never, I never worked for Fauci. I'm National Cancer Institute for 22 years. That's why I told you that. And in fact, I only talked to Fauci three times in my life.

And each time I told him to do to himself, which I now appreciate is anatomically impossible. Um, except for, um, people like Fauci.

I'm working on it. I'm just working on it. Um, so I told him that and of course, Frank Rossetti came back. He was immediately called from Fort Dietrich where the National Cancer Institute where we do our work along with USAMRI, U. S. Army Research Institute of Infectious Disease. So why is a bioweapons ban?

Program with your new cancer institute since 71. Why is that there and, and, and why are we doing studies to change the spike protein? The Surface Unit, the envelope, which Frank Rossetti's wife, Sandy Rossetti in 1980 showed that the spike, the surface unit, the envelope alone of any retrovirus. was all you needed to cause disease, but you had to inject it because it wouldn't infect without injection.

So gain of function is doing molecular manipulation of a natural isolate, which you can't patent. Dave Martin, Planemic Indoctrination, August 18th of 2020, critical part of this awareness that Mickey Willis gives us with the movies, as well as the Informed Consent Action Network, what we learn on the high wire.

This is why we teach the censorship, the censorship. So gain of function, in fact, the first gain of function was HIV. So the experimentation and the deplorables at that time was gay men, IV drug users, and prostitutes. But Magic Johnson wasn't a gay man or an IV drug user. So the only thing that one could realize how he got HIV when he made an antibody, And was on the cover of Time Magazine, November 7th of 1991.

The only way he could possibly have gotten it was to be having sex with prostitutes. So our athletes Our athletes are assumed what kind of racism and he was actually engaged at the time. So we know about what they're doing to our black families. And as Peter McCullough said recently at an autism health meeting, the number one risk factor, For a diagnosis of gender dysphoria is a diagnosis of autism.

Ah, so now we start to see the explosion of chronic disease. So we had to inject it. What kind of racism? takes a virus that causes more cancer in aggressive prostate cancers in men is weaponized. Why was that given? Why was that gain of function virus injected in your athletes, your military, everyone since 1992 without any oversight?

In a newborn baby on the first day of life in a hepatitis B vaccine, and you'll see all of this in the real Anthony Fauci. And then you'll make the parallels of what they did in those hospitals. I'm here at Hospital Homicide, where they murdered millions of our husbands and called it COVID. And, and it wasn't COVID at all, nor was it, you know, they murdered him with remdesivir, like they murdered Mickey Willis's brother and mother.

You know, how did he get his brother get HIV? Well, he was a gay man and his mother was living on the dole. Ah, so she had to get it through. Oh, um, Medicare, Medicaid. You know, and as he says in the movie, Plandemic, um, 3, the one that is the Great Awakening, with G. Edward Griffin, Patrick Wood, beautiful Christian man there in Phoenix.

I hope you will invite Patrick Wood to the meeting in March, as you see my brain works this way, it's a little bit circular, but at any rate, so, Patrick Wood, but this is the thing, when you go back to the movie, And, and now the opportunity for worldwide for us to look back, speak the truth in love, forgive yourselves and forgive each other because you let that happen because it wasn't you.

And the book I'll bring up with that is My friend and Pastor Rob McCoy's friend, Eric Metaxas and Bonhoeffer. So Bonhoeffer, my, my husband, one of his heroes, you know, because if not now, what's that story about? You know, and when we go back and we look at how we're We're all one nation, one, one tribe, uh, nations, the nations and this nation given by God is the great experiment, you know, where more discoveries are made by the 4%.

Well, um, it's, it's up to us. That every knee bows, and the only way to do that now is speak the truth in love with gratitude and forgiveness. We all made a mistake. And so Mickey Willis, even by and I love Mickey and you know that, um, by the, the movie, the great awakening, I prayed he would not put my face or anything anywhere near that movie, but that he would highlight that beautiful woman from China.

As she, as she, you know, said, what are you guys doing to your country? You're the last place. We can't have this collectivism. We can't have this, we can't be taken over. That we can't be China. We can't let the Bernie Sanders take over. We can't let the treason. But most of the people weren't involved with the treason.

Um, the evil ones are Gallo, Chabner, And they did it with HIV. Why is Gallo running an institute in Maryland? When why was, and this is the book, um, by my co author, Heckin Lively, inoculated. You know, why was our country, why did it take this? The heads of state, Ronald Reagan and France President Mitterrand, to negotiate who owned the rights to a test when millions are dying and becoming contaminated, infected around the world, where a blood supply got contaminated, such that Arthur Ashe and Ryan White, a little boy with hemophilia with multiple blood transfusions.

You see, it all goes right back to. There and and you can even see the lie in all of it when you do chat AI chat GPT and say who is Judy Mykabits and they talk about Plandemic but wait a minute they said I said COVID or XMRV and Plandemic. No I didn't and I didn't say Fauci either. Plandemic was all about AIDS and it's brilliance of Mickey Willis.

So I mean, yeah, gain of function. HIV, right there, never was LAV, AIDS, you experimented on gay men, IV drug users, and prostitutes, so why did you inject our military, our athletes, our athletes, my nephews there in Phoenix, it makes me mad, why were our military poisoned, why did you experiment on our best and brightest like you, why did you take us out of the society, why?

Dr. Judy, um, are our blood banks safe? And if they aren't, how do we make them safe?

Well, they are now, because when you read that chapter in Plague of Corruption series, what we showed when we discovered the XMRVs and as a part of the paper, We actually showed that their detection method, no matter which variant, even Ebola, their little method of decontaminating the blood supply.

They used it corruptly. They said it was never there. We don't care. Yes, we can clean it up. Can we clean up the synthetic ones? That's a question. The M RNA with a capital M because the mouse, monkey and kidney messenger RNA. That mRNA has been in every shot unchecked since 1992. That's why I've said this.

Yeah, which, which mRNA vaccine did you get? Did you get the cow one, the pig one, the bird flu one? Did you get the MMR5 that had all of those in it, including an avian lucosis virus? Come on, folks. That's the Gotti paper of 2017. And you see, All of this is published in on our website. Um, so, um, it's just, um, you know, it, it, the blood supply.

We also have true blood, um, true blood, um, and safe safeblood. us, which is now worldwide. So we never stopped worrying about the blood supply. So now there are many opportunities for the vaxxed and the unvaxxed, but we don't need to discriminate. I don't want to see us live in fear. We got this because yes, we did it with, we did it with Cirrus, C E R U S, and we know the boondoggle and the government's going to make it safe.

You know, basically over their dead body, not mine, because I've already been on that chopping block and, and now they're going to be forced to do what the American people and the people worldwide actually paid for, because you, the taxpayers are going to get back the solutions. That's the key. That's the last chapter.

Maybe there's one last story I should tell you. We saved all the proof of everything I just told you. I've got the manufacturing plant that literally the cell line, the Vero monkey kidney cell line where with the Charles Robinson cell line, huh? One Oh two. You, I got them all. Every one of them are in the freezers.

And the movie Protocol 7, watch the end of Protocol 7. That's a mix of Andy Wakefield's story, our hero, the doctors. And then the scientist was me, the lab rats. And, and, um, I won't spoil the ending, but it's so God brilliant. I just love Andy Wakefield. And, and again, 1986, the act. com. Protocol7. com, all four, all four, PlandemicSeries.

com, all four versions of Plandemic will show you how God wins. And the last one is just, um, Plandemic the musical, showing you how much fun we have working with each other.

Dr Judy, um,

I just lost my train of thought there. I was going really well with that one. Um,

well, that's good because it was a sigh and I want to see a smile. I

got it. I got it. I remembered it. I remembered it because you're just bombarding us with so much information. Everything you're talking about is great for the USA.

But in Australia, we are so far away from what you're talking about happening over there. We are still living in this media driven narrative that is just driving us insane. Have you worked with anyone in Australia? And are you familiar with people in Australia such as Dr Kerry Chant?

I, I'm familiar with Dr.

Carey. I've worked with people in Australia. Interestingly enough, we, we all came after HIV and we were looking at, at koala bears and you guys got a little cancer in your koala bear and you know, you know, Could fix that. So we could see what was happening in Australia. And yes, we've been there with the solution since 2010, as well as in the Czech Republic, as well as in Germany, as well as in Holland, Norway, Denmark, worldwide.

And yes, we'll pull it together. New Zealand.

John, you need to get in the

Uh, Dr. Judy, uh, Dr. Kerry Chant, um, essentially was driving, uh, this entire, uh, narrative in New South Wales, um, a state of, uh, of Australia. Um, and she said that transmission, um, was reduced, um, by being vaccinated. Uh, by being MRNA vaccinated.

And she would get up every day at a press conference at 11 o'clock and say, Your grandmother's gonna die if you, if you talk to her over the back fence. Uh, the fear was outrageous. You must get vaccinated to stop transmission. Was, was that? Was that bullshit?

Yes, it absolutely is a lie. And our centers for disease control and oh, so quietly the W.

H. O. Changed the definition of vaccination to say that you don't have to reduce transmission. You just reduce hospital stay or less severity. Neither of which is true. As they're hospitalized for something else that you said, like those turbo cancers or like that AIDS that acquired immune deficiency when you're and no, it actually ramps up the transmission.

That's why I mentioned the 2016 AIDS research and human retrovirus article that said standard any vaccine will increase the expression of the M. R. RNA of the latent HIV XMRB, which is SARS CoV 2, was in every folio vaccine. So she knew not only would it not cause transmission, stop transmission, but it would cause pathogenic priming.

So in this, in the CDC, we've all, we've got all the data for this worldwide. So you see, she's the one we want to say, I was wrong. I will repent, and I will do everything I can to do the right thing this time. And then she will be forgiven her crimes against humanity, but she will have to pay the price. So she can decide when she wants to purvey their rights.

My job is to convince the Dr. Careys. I know of the people that went after me. I know of the people that You know that told a lie. How about every doctor worldwide who didn't give horse paste or any pharmacist? Um, again, if you didn't know ivermectin was a pure inergic modulator or Wnt modulator, and you don't know what I just said, perhaps you should shut up.

Um, Sorry, be quiet. Um, but, but again, this is the arrogance of the MDs. Do you know what was in the needle? And if you didn't, then you're criminally liable at this point of time. Now everyone was lied to by the WHO, the CDC, the everybody was lied to for 40 years. 40 years. This did not start in 2019. We blame no one for not knowing in 2014 because I was censored and jailed and so the others were killed.

We get that, but as of 2019 and pandemic at 2020, You should have no. And so now we, we hum, we ask her to humble herself and repent or else. I'm sorry, you have to face your crimes against humanity. And, and that's the easiest way to say it. We're all about. Gratitude to God for, for, there's none of us that didn't do it.

Any pharmacist that didn't give you ivermectin. Anybody who didn't give you hydroxychloroquine. Anybody who lied to President Trump and made him sign the universal flu vaccine. Peter Navarro spent time in jail. That's David Martin told us that in plandemic indoctrination on September 19th of 2019, Fauci and company, Deborah Birx and Robert Redfield, they're criminals in our country.

And they haven't humbled themselves and said, Oh, no, we made a mistake. You know, and long COVID is myalgic encephalomyelitis and Australian and Ireland and Belfast and the U. K., the U. K., the U. K. A disease able to affect the economies of nations is the forward of our first book plague by Hilary Johnson and she found out, she met me May 29th 2009.

Our science paper had already been submitted, and when you read that, A Disease Able to Affect the Economies of Nations, who is, is Jonathan Stoeck, um, of the Journals of the UK, Is who who who promoted the contamination of the blood supply who promoted the lie about our paper along with John coffin of the US.

This is what Bobby said. Our journals, you know, our scientific journals are criminal fraud and Cheryl Atkinson's book last night. We played it on our X space. You can listen again today. Her book is called. Follow the science. And it's not me. It's all the other cases of where the frogs I played chapter four and part of chapter five of drugs we know of, like the Ozempic, who are deadly snake venom peptides injected, you know, all the things they're doing right now to kill as many as possible and create a new narrative.

Well, The jig's up and um, and now the truce out and so I'm, you know, we're not here, I'm not angry. I'm, I'm, I'm, I'm, you know, I, and I'm, I forgive myself for any role I played in that my anger And my inability to tell Fauci what to do to himself, um, that's not anatomically possible in a nicer way could have changed a lot.

But all I did was, you know, poke the bear. And I particularly have a really good time poking the bear. That's fun for me. But as Jesus was teaching me, you know, he went to God the Father as my defense attorney and said, Yes, father. She said that. Yes, father. She said that too. But at the end of the day, he said, I approached the bench and he says, all is forgiven because you admitted you said it and it wasn't.

Very funny. And I'm sorry. Please forgive me to the best of my ability. I won't do it tomorrow. And so there you go. That's all I can do. And so it's not really funny, but

you've just summed up the Christian walk beautifully. That's exactly what it's all about. You know, if we take, if we take corporate religion out of that whole scenario and just, and just see it the way you've just described it, that's just a beautiful analogy.

And a lot of people will be watching that and taking that in. Um, Johnny,

well, the only one I could think is Rob. Godspoke Church because I just co opted Judge Max Sermon from Texas from a couple of weeks ago where he used that expression and I thought it was so much nicer than the way I say it. I'm not, I'm not against stealing other people's lines when they work.

No, it works. Do it. Go Johnny.

What's uh, Dr. Judy, what's Bill Gates's role in all this?

Um, the, the satanic, um, genocidal, um, hater of humanity, um, uh, you know, um, appointed himself to be the, uh, unelected, never got a thousand votes. Why is a no doctor? He doesn't even have a college degree. Why is he directing?

Um, sterilization and extermination programs across the world under the, um, the guise of so called a vaccination. Why is he sending Christian missionaries with toxins and, and lying to them? The book is called called for life by Dr. Kent and Amber Brantley, how he killed 28, 000 Liberians by way of Fauci and Obama.

In 2014 in order to cover up the Ebola at outbreak of 2014, in order to cover up William Thompson's confession of the CDC and the movie Vaxxed, which showed in fact that. The signal of, of to remove that vaccines had anything to do with autism doesn't, nobody uses the cause word in a multi disease, but they do that to you safe and effective.

So Bill Gates is Satan, is satanic. He didn't get a single vote either. He hasn't repented and taken back his data. No, he doubled down and he paid for money. on the view to try and keep Bobby Kennedy and keep his abortion game going on. And so when, and when Bobby Kennedy and Pastor Rob McCoy and I sat in Godspoke Church in February of 2021, um, and talked about this very issue, um, I would write on that slide, you pro choice is the new pro life.

And I know this irritated, unfortunately, poor Pastor Rob who has to deal with me. But what I, he's trying. Um, so what I, he doesn't have to, but he chooses to because I'm a widow and he obeys this. So I take that widow thing as far as I can take it. Um, But it's working. Anyway. No, I love him. He's watching.

Anyway. Um, so but but the point was we sat on that stage in 2021 and a lifelong Republican Rob McCoy talked to a Democrat and he's very upset about the stance on abortion. Well, I'm a diidentical twin. And because I'm You know, I'm so smart and I was doing all this drug development at the National Cancer Institute.

Um, I, I believed at the time that that Life Star didn't start at conception. Um, but in fact, that life started, it implantation, oops, I got kicked off of there.

We still got you.

I got you. Okay. So, so I believed that in fact there was nothing wrong with, um, a lifestyle where I would simply take RU 486, which is the drug they're fighting for in Congress.

Oh, you can't take away that drug, RU 486. I'll look up the chemical name. They don't say RU 486 because that was the best single abortion pill. We called it the morning after pill. So you could go live your life. Style anywhere you want. And then you can simply take a pill and you'll never be having an abortion.

And now I know you will be destroying life because in vitro fertilization is against God. You don't get the opportunity to sin. You have to repent and stop the sin. So in fact, I now realize, um. You know that because of my naivety, if you will, as a young person now, I can justify that any way I wanted, but I don't know how many human lives got intended that I prevented by the indiscriminate use of a medication that actually kills, um, babies and unborn fetus conception is light.

Now, science will show you that beyond a shadow of a doubt. And, um, and I, that's the work that I show. So I'm going to plug in in case I'm responsible. So the work that I now show and the science I now show says that. No matter what you have done, once you repent, I realized as a kid, I used a drug and justified that not, not listening to the word of God that life begins at conception and the only person who decides on the day he formed the universe when you're going to be born and when you're going to die.

And what happens in between is your choice. Well, I broke the 10 commandments. I got into ego and decided I could be my own God and live the way I wanted to live. And then I could just take a pill and abort the problem. And that's not okay. So when I say pro life, a pro choice is the new pro life. Now, the next time I put that slide up with Bobby sitting on the stage with me and Rob McCoy in February of 2021, having a conversation, now I say you can't mandate abortion because that shot was the single deadliest shot, as I said at the beginning of this show.

How many? Lives it will destroy, um, is ongoing. And the hospital homicide is horrendous. So we need all hands on deck and including that Dr. Carey, we know how to heal it. We've got the solutions, humble yourself, show up at these meetings. We, we will forgive you. We will welcome you. Um, um, but, but we must have the repentance.

Absolutely. Absolutely. I sat in a, in a, in a mainstream media program as a guest last week and I put my views forward on vaccine mandates and then they crossed to the head of the Royal College of General Practitioners in Australia, a doctor, and she said, vaccines are safe and effective. They've been thoroughly tested.

They've saved millions of lives. We must trust the science. Can we trust the science?

There is no science. There is no science. Show me the data. Science isn't the, uh, Fauci. You know, science, that's a cult. You know, show me the data. I've only put in every talk, that's why I talk like this. I'll show you.

SARS-CoV-2 was created and published in 2004. It's the more paper, I'll put it in the show notes or Johanna will for you because that's what we do. So they, it's, it's all on the real, Dr. Judy. So how can you say SARS-CoV-2 caused Covid? If you injected it in every polio vaccine since 2004, I can prove it and I will bring it.

You bring me the science and I'll, and I'll stand and, and we, it, it's not a debate. It's data. There's no such thing as consensus science. What, when Tony Fauci and Big Pharma went to then President Ronald Reagan in 1984 through 86, when the lawsuits of children injured, that's the movie 1986 that we're talking about, The act.

Look at Barbara Lowe Fisher's book on, um, a shot in the dark. You know, it's a shot in the dark. They weren't tested. They were never tested because when all what what Fauci and Pharma did to then President Ronald Reagan because he said the right thing. They said, protect us from these lawsuits, or we won't make your vaccines.

Ronald Reagan said, why don't you make them safer? And Tony Fauci said, they're unavoidably unsafe. Someone will always die. Oh, wait a minute. You can't cause someone you don't know to die. That's not safe and effective. You just use a buzzword and you don't know what you're talking about. And I do. And so I'm just going to show you the data.

I'm willing to sit down with anybody and bring the data. As Tony Ouchy. He can call me anything he wants, not a CFS researcher. I'm a National Cancer Institute veteran. I developed the piece. I own the patent for the PCR test for all things covid. I own the the antibody test. I own the chemokine signature and I own the patents through a company called Genius Omniture, an international company, um, that also show you the cures with botanicals according to the 2004 Botanical Drug Guidance Act.

Oh, and the FDA stopped us from giving that to people. And so are you right now? So, you know, the conversation is not safe and effective. The conversation is bring it. Consensus has nothing to do with science. Science is never settled. There's no such thing as a peer review. As Frank Rossetti says, I have no peers.

And I say, and neither does God. It's You can call yourself the cult of whatever you want to call yourself, Tony Fauci, the cult of scientism, but medicine is not science. Sorry, and a medical paper publication is a commercial for pharma. When all liability was removed from pharma, when, when Tony Fauci said they're unavailable.

They're unavoidably unsafe, the liability and the safety testing and everything else was placed on HHS, Health and Human Services of the United States of America, starting with the Senate Majority Leader who doles out the money. You want to see how quickly that changes? Criminal Harry Reid who did this?

From 2008 in the Obama administration, criminal Hillary Clinton. Why were they experimenting on the African Americans versus the European Americans? Answer that the publication is 2008. I show you the data and whether you like it or not, you know, um, sorry, bring me. Any data that says otherwise, nobody has in 45 years.

So I'll keep talking

and Dr. Judy. It's probably timely just for us to remind our viewers that Dr. David Martin on our program, uh, established, uh, essentially what you're saying in relation to SARS CoV 2 with the patents. Um, they were registered, um, around those times. Um, so it's, it's, It's, it's completely, uh, um, true what you're saying.

Yeah. Not one word. 100 percent censored, not one word debunked of anything in the Plandemic series.

Unbelievable. As I sat in that studio last week, uh, it really hit me that the world has changed to such an extent. That I, as I was thinking about it, listening to these different points of view, the world has been divided right down the middle into assets and liabilities.

Some human beings are considered assets and others are liabilities. Who gets to decide who's an asset and who's a liability?

Well, um, certainly not us. I mean, right now, that's what our corrupt government is doing, but everyone's an asset to God. Each one of us is fearfully and wonderfully made. And these aren't, God didn't make oncogenes.

Sorry, God didn't make cancer causing genes. And God didn't need help. God didn't need genetically modified foods because the problem is vaccinating our plants and the problem is vaccinating our animals and the problem is vaccinating humans. The problem is the poisoning of the soil and the removal of the archaea and the terpenes and the cannabinoids and the plants.

The problem is the heavy metals in the air and the water and the poisoning of our skies. So, The neat thing is that, you know, God knew all of that. Um, and, and now we, the people worldwide are going to fix this. And, and, and, and we do it by loving each other. And we're having a great deal of fun getting together, even people we disagreed with.

You can listen on shows and I'm, I'm going after Dr. Peter McCullough or others. And I go after him only on science. Please don't say, you know, you wrote a paper that that used the drug, you use the wrong name of the drug. I'm sure you didn't intend to do this, but you also said a 23 year old was otherwise healthy when he had autism, which is not a God given genetic.

hereditary disease, nor is any of these others, uh, inborn error of metabolism. God didn't make inborn errors of metabolism. It's all about perspective. But again, you know, he will humble himself the next time I see him and say, you're right. He's not otherwise healthy. And I had to consider the neurological damage.

And when I used a synthetic version of a natural product drug, it doesn't, it doesn't react the same way. So when I use that drug and I use, oh, it's the same family member and the science literature is corrupted. So it's, it's not honestly his fault because he's an MD. He's not done these experiments. And that's where, when we get our education back.

When, when I joined science, when I, when I first started June 10, 1980 at the National Cancer Institute as a fermentation chemist, I make beer and wine, just saying, I ferment stuff. Yeah, exactly. . That's how I know terpenes and IPAs in the dirt. Well, you know, rapamycin was fer fermented rapamycin.

Tetracycline their God, give natural antibiotics in the dirt, Sanji mycin to mycin. You know, now I have the advantage of G Chat, GPT. So I, I said these things publicly and I said, Hey. Anybody using Sanjeevamycin and Toyokamycin? And they say, yes, the ansamycins are great for the bird flu du jour. And I'm like, oh good, buy me up some of that stuff because you can't patent that.

You can't patent it. It's not drugs. It's prescription drugs. So it's about the who's a liability. Well, how good your insurance program is, is how long you get to live. Um, and, and, and, and the cult of scientists is actually giving people end of life drugs. dates and giving them, allowing them to Kevorkian themselves, you know, after nurse ratchet took us all out, hospital homicide, you know, while they tortured our family members and drove that lie by killing, killing mainly innocent Christians.

And that was okay, because we were un vaxxed. Oh, we didn't bow down to the cult of Tony Fauci. Oh, so you could, like FEMA in our country, you could go, you could not take care of the people with the, with the Trump signs. They did the same thing to Kennedy. Oh, Kennedy, uh, you know, and, and anybody else. Me, doctor.

So, you see, how, who's a liability? Well, it depends on to whom you're talking to. Um, your, uh, your allegiance is, and mine is only to the one God who formed the universe, and every single person in this is here, and God knew when he formed the universe, this was going to happen. And we are the the esters of the world and for such a day as this we stand as Dietrich Bonhoeffer stood before us and one nation under God because if it's just the Jews the next time it's you and that's why we have to stand up for all the people at this time and and make disciples and there's only one way to do that.

There is indeed. And, um, look, I'm going to have an opportunity to meet you in Phoenix, Arizona, on the last weekend in March at the Will You Be Made Whole Again, uh, conference at the Dream City Church, I think it is. And there's 3,000 seat capacity. It's filling up fast. It's a three day event. Uh, I'll be there with Dr.

Ben Carson, Dr. Peter McCullough, Charlie Kirk, and many others. And hopefully you will be on stage. If not, you'll be in the audience, which, which I'm honored to be at. And look forward to meeting you there. So if you live in the States or you can get to the States, get to that conference, it's going to be amazing.

I'm so grateful to be invited to speak there on behalf of Australians. And, um, I look forward to seeing you there as well. Um, Johnny, have you got any final comments?

Well, look, I'd be very grateful. Uh, Dr. Judy, if you could send down a couple of recipes for a couple of beers, we've got a hotel up at Singleton, called the Caledonian Hotel, the Cali.

Brad's the, uh The owner of the pub there. I'm sure we could, we could make a very bitter ale, a couple of them. Um, and we could call it the Dr. Kerry Chan on tap and, uh, the Brad Hazard, who was our health minister, um, who I refer to as one of the greatest. One of the greatest, uh, misfits of all time, um, in relation to COVID, um, You'd like to

tell him, you'd like to tell him to do something anatomically impossible.

I think, I think you've actually said it.

Probably once or twice, but, uh, I'm sure you would have the recipe for, for a magnificent drop and, uh, the Kelly Hotel would, would absolutely love to pour it up there, I'm sure.

I'll make sure you get that and I'll, I'll send it to you for sure. And I'll have, we can change the hops.

We can make it more bitter as they get sweeter, right? Exactly.

Exactly. And, um, and, and I want to just ask you to, to look into the camera and, and make an appeal to Dr. Kerry Chant in New South Wales. She's the chief medical officer.

Well, um, Dr. Kerry, um, you know, um, I pray for you each day as I pray for everyone around the world to humble yourselves and then the same and, and, and let the Lord's will be done, you know, on earth as it is in heaven.

And we will realize that heaven on earth, as we all forgive each other and, and love each other. We all made mistakes. We're all a train wreck and, and, but this day, if we unify and work together, um, you, you'll be able to share that, that drink with us at the pub and, and we'll be delighted to, um, To have you heal and do the job I know you intend to do as that health minister that everyone, everyone in Australia has an equal opportunity at living their happiness, their health, as God promised each and every one of us.

That's wonderful. And with that being said, can you bring this to a close with a prayer for us? And don't go anywhere until, until we tell you we're still recording.

Well, um, I say the same prayer each and every day. And that's the Lord's Prayer. You know, to our Father, who art in heaven, hallowed be thy name.

Thy kingdom come, thy will be done, on earth as it is in heaven. Give us this day our daily bread. And forgive us our trespasses, as we forgive those who trespass against us. Lead us not into temptation, but deliver us from evil. For thine is the kingdom and the power and the glory forever.

Amen. Dear Lord, please grant us the serenity to accept the things we cannot change, the courage to change the things we can, and the wisdom to know the difference.

Living one day at a time, enjoying one sweet moment at a time, accepting hardship as a pathway to peace. Taking as Jesus did this sinful world as it is and not as we would have it. And trusting that you will make all things right, if we just surrender to your will. So that we can be reasonably happy in this life, but supremely happy with you forever and the next.

We pray in Jesus name. Amen. Amen. Dr. Judy, you are an absolute breath of fresh air. You're the shot in the arm we've needed after a pretty hectic week. We want to get you back on again. I'll see you in Phoenix and that we just, we just love you to bits. And we know our audience is going to love you to bits.

You're amazing. Johnny,

you just couldn't make this stuff up.

You couldn't make this stuff up. Don't forget Australia. What you did yesterday got you to today. This is a day by day proposition. And if you love somebody and you haven't told them, please call them and tell them it's really, really important.

Stay out of the trees. And we can't wait to get back to you on Club Grubbery for our next episode. Dr. Judy, you've been absolutely amazing. You really are the real Dr. Judy. God bless you and thank you all for watching and bye for now.

God bless you. Bye for now.
